Main Activities

Besides investments in Innovative Small and Micro Enterprises, Biovalley enhance biohightech companies growth through:

▶ INDUSTRIAL ACCELERATION

▶ R&D PROJECTS

▶ MANAGEMENT SUPPORT

Biovalley's main activities span from Analysis and structuring of business plans, to identification and enhancement of possible industrial synergies, evaluation of investment projects, financial planning and development of commercial networks.

ChemoMaker⁺

As result from one of the many R&D projects in which Biovalley is involved, ChemoMaker⁺ is an innovative technology for the compounding of patient-specific chemotherapy drugs.

ChemoMaker⁺ has several advantages over manual preparation such as:

- Automated check and verification of the whole compounding cycle
- High dosing accuracy, individually verified for each compounded dose
- Optimization of unused drugs waste, significant cost saving
- No contamination risks for the pharmacy operators
- Human errors prevention, less risks for patients

BioHighTech-NET 4.0

In 2016, the first network of over 35 companies promoting services for Smart Health and the BioHighTech sector through innovative products and services was set up under the auspices of Biovalley.

On 21st February 2020 a new network with legal personality is born: BioHighTech-NET 4.0.

21 SME's have joined in the first instance, while others have already declared their intention to do so at the first useful meeting of the Management Committee.
